Subject: Dimock, PA sampling data posted on web

FYI, EPA Region 3 has shared with local residents the fourth set of data which includes the 4th and 5th weeks of private well sampling in Dimock, PA. This set of sampling did not show levels of contaminants that would give EPA reason to take further action. At one well, elevated methane was found - we informed the resident, PADEP, and county emergency responders.

The data for 12 additional homes has been added to the file posted at
<http://www.epaosc.org/sites/7555/files/Dimock%20W1,2,3,4,5%20-HW07&HW-53%20Compulation%20Report.pdf>
Please note this is a very large file.

We were unable to deliver data packages to 2 of the 14 residents whose wells were sampled in weeks 4 and 5; thus the total number of homes displayed in that chart is 59, rather than the total of 61 homes sampled to date. We will post the data from those 2 homes after the homeowners receive the data.

If you have any questions, please contact Jennie Saxe, EPA Region 3 PA State/Congressional Liaison, at saxe.jennie@epa.gov (215-814-5806), Pamela Janifer, or myself. Thank you.
